

Executive Summary

Fixed income experienced some volatility in the first quarter of 2024. Inflation prints came in above or at expectations throughout the quarter, and the Federal Reserve (the Fed) kept rates stable. Performance was driven by an upward shift in the Treasury curve, as yields moved up and the market priced in higher rates for longer. Against this backdrop, the Victory Short-Term Fixed Income Strategy outperformed its benchmark, the Bloomberg 1-3 Year Credit Index, for the quarter ended March 31, 2024, on a gross and net basis.

Market Update & Commentary

At the beginning of 2024 markets were very optimistic that the Fed would cut rates aggressively. Coming off the rally in the last two months of 2023, interest rate futures pricing reflected nearly seven rate cuts in 2024 at the beginning of the quarter. But the Fed's "wait and see" approach to lowering rates left market participants struggling to align on a single narrative and throughout the course of the quarter, rate cut expectations dimmed in response to higher-than-expected inflation and a remarkably strong labor market.

Nonfarm payrolls increased throughout the quarter, continuing a trend of persistent employment growth. By the end of March, the market had reconciled itself to expectations of only three or maybe even two rate cuts during 2024. The market's intense focus on economic reporting this quarter drove timing expectations for the first rate cut further into 2024, from March to June at the earliest. Evolving expectations for the future of the federal funds rate caused the Treasury curve to rise across all tenors, and the rise in yields led to negative returns across most broad bond indices with the exception of high yield.

The Consumer Price Index, a popular measure of prices paid, and thus, inflation, increased to 3.7% from 3.1% during Q1 2024. These past three months investors discovered the Fed was not bluffing when Chairman Powell noted in December that should economic conditions change, keeping rates higher for longer is not out of the question. While the Fed maintains that the data do not materially change their economic outlook, there is a small but nagging concern that the Fed may need to reframe the path forward should inflation be stickier than expected. As a result of recent inflation prints subverting expectations and a particularly resilient labor market, all eyes stay on the Fed and future monetary policy.

Source: Bloomberg

Credit spreads tightened across fixed income asset classes apart from mortgage-backed securities in the first quarter. Tighter credit spreads indicate lower compensation for taking on additional risk. Fixed income showed mixed performance in the first quarter, driven by a rising yield curve. The upward movement in yields resulted in negative returns for the Bloomberg U.S. Aggregate Bond Index at -0.78%.

Portfolio Performance & Positioning

During the quarter, we increased our allocation to Treasuries and corporates, while decreasing commercial mortgage-backed securities (CMBS) and taxable muni exposure.

Contributors

- Best performers relative to the index were banking, asset-backed securities (ABS), CMBS, property & casualty, and retailers.
- From a credit perspective, relative to the index, our allocation to BBB and high yield bonds provided the best performance, along with our underallocation to single-A bonds.
- Allocation and selection contributed 85 bps to performance.
- Duration added 1 bp to performance.

Detractors

- Sectors that detracted from performance relative to the index included Treasuries, tobacco, other industrial, transportation services, and independent exploration & production.
- From a credit perspective, relative to the index, single-A and AA bonds performed the worst.

Performance

Average Annual Returns (%) as of March 31, 2024

Victory Short-Term Fixed Income Strategy	QTD	YTD	1-YR	3-YR	5-YR	10-YR	Since Inception (July 1993)

Past performance cannot guarantee future results. Returns for periods greater than one year are annualized. Returns are expressed in U.S. dollars and reflect the reinvestment of dividends and other earnings. Composite and benchmark returns are presented net of non-reclaimable withholding taxes, if any. Gross-of-fees returns are presented before management and custodial fees but after all trading expenses. Net-of-fees returns reflect gross performance less investment management fees. Net-of-fees returns are calculated by deducting 1/12 of the highest tier of the standard fee schedule in effect for the period noted (the model fee). The composite model fee for each period is either the highest tier of the current fee schedule or a higher value, whichever is required to ensure the model composite net-of-fee return is lower than or equal to the composite net-of-fee return calculated using actual fees. Actual fees may vary depending on, among other things, the applicable fee schedule and portfolio size. The firm's fees are available on request and may be found on Part 2A of its Form ADV.

All investments carry a certain degree of risk, including the possible loss of principal, and an investment should be made with an understanding of the risks involved with owning a particular security or asset class.

The Victory Short-Term Fixed Income Composite includes all institutional and retail portfolios invested primarily in a broad range of debt securities that have a dollar-weighted average portfolio maturity of three years or less. The debt securities in which the composite portfolio may invest include, among others, obligations of U.S., state, and local governments, their agencies and instrumentalities; mortgage- and asset-backed securities; corporate debt securities; repurchase agreements; and other securities believed to have debt-like characteristics. The strategy aims to deliver high current income without undue risk to principal. Portfolios in the composite will invest primarily in investment-grade securities, but also may invest in below-investment-grade securities, which are sometimes referred to as high yield or “junk” bonds. High yield bonds carry increased levels of credit and default risk and are less liquid than government and investment grade bonds. The composite creation date is July 2019 and the composite inception date is July 1993. The benchmark of the composite is the Bloomberg 1-3 Year Credit Index. Prior to 4/24/2023, the name of this composite was the USAA Short-Term Bond Fixed Income Composite.

The benchmark of the composite is the **Bloomberg 1-3 Year Credit Index**. The Bloomberg 1-3 Year Credit Index measures the performance of U.S. dollar-denominated investment grade debt publicly issued in the U.S. domestic market, including U.S. Treasury, U.S. agency, foreign government, supranational, and corporate securities, including all securities with a remaining term to final maturity of less than 3 years.

Index returns are provided to represent the investment environment during the periods shown. Index performance does not reflect management fees, transaction costs or expenses that would be incurred with an investment. One cannot invest directly in an index. **Past performance does not guarantee future results.**

Information relating to portfolio holdings is based on the representative account in the composite and may vary for other accounts in the strategy due to asset size, client guidelines and other factors. The representative account is believed to most closely reflect the current portfolio management style.

Victory Capital Management Inc. (VCM) is a diversified global investment adviser registered under the Investment Advisers Act of 1940 and comprises multiple investment franchises: Integrity Asset Management, Munder Capital Management, New Energy Capital Partners, NewBridge Asset Management, RS Investments, Sophus Capital, Sycamore Capital, THB Asset Management, Trivalent Investments, Victory Income Investors (formerly USAA Investments, a Victory Capital Investment Franchise), and the VictoryShares & Solutions Platform. Munder Capital Management and Integrity Asset Management became part of the VCM GIPS firm effective November 1, 2014; RS Investments and Sophus Capital effective January 1, 2017; Victory Income Investors, effective July 1, 2019; THB Asset Management, effective March 1, 2021, and New Energy Capital effective November 1, 2021. Effective September 1, 2023, INCORE Capital Management is no longer part of the VCM GIPS firm.
